

Wish application development could be made a little simpler – and a lot faster?

Hate spending precious time fine-tuning and testing your composite applications?

Corizon can help. Introducing WOW! Platinum Support: Test Case Service

Worried if the latest powerful Corizon release is going to successfully pass your tests? Concerned that you will have to spend scores of hours to test the release for your individual needs? Don't install updates more frequently because of the time required for update release testing?

No problem! Corizon's Test Case Service is your solution.

With Platinum Support, Corizon will take your test cases, automate them, and include them as a part of our test suite for every release. Each monthly release will be tested on this enhanced test suite, providing you with assurance that the release **works for you** before it ever touches your machines.

Did we say monthly releases? Yes we did!

Corizon now delivers monthly update releases to methodically resolve issues that matter to you. Have more than one unique test case? Send them along; there's no limit!

Need to change the test case you provided? That's OK too. We'll evolve our tests as you evolve yours.

No pain, all gain.

Contact success@corizon.com for more information.

Our WOW! Platinum Support Test Case Service

How it works

1. Upgrade to WOW! Platinum Support by contacting us at success@corizon.com
2. Log a test case ticket on our support portal at <http://support.versata.com>
3. A member of our release management and test team will contact you to collect your test or understand your test needs.
4. Leave the rest to us. Our release team will collaborate with you to build it, check it and deploy it.

Once we implement your test case, we will check it against each subsequent release of Corizon, for as long as you remain on Platinum Support.

It's automatically included in the test suite, so you can consider each new release with confidence in its quality. You'll be able to rest assured that each new build works against your test case, month after month after month.

That's guaranteed performance, with no heavy lifting.

Get WOW! Platinum Support today.
